

Doosan Infracore
Portable Power

12/150

Doosan purchased Bobcat Company from Ingersoll-Rand Company in 2007. Any reference to Ingersoll-Rand Company or use of trademarks, service marks, logos, or other proprietary identifying marks belonging to Ingersoll-Rand Company in this manual is historical or nominative in nature, and is not meant to suggest a current affiliation between Ingersoll-Rand Company and Doosan Company or the products of either.

General

This manual, which contains an illustrated parts breakdown, has been prepared as an aid in identifying and ordering parts for the machine. All of the parts, listed in the parts breakdown, are manufactured with the same precision as the original equipment.

Ingersoll-Rand Company service facilities and parts are available worldwide. There are Ingersoll-Rand Company Branch Offices and authorised distributors located in the principle cities of the United States. In Canada, our customers are serviced by the Canadian Ingersoll-Rand Company, Limited. There are also Ingersoll-Rand Company subsidiaries and authorised distributors located in the principle cities throughout the world.

Description

The illustrated parts breakdown identifies the various assemblies, sub-assemblies and detailed parts which make up this machine.

A series of illustrations show each part clearly and in its correct location relative to the other parts in the illustration. Each part in an illustration is referenced with a number. The number, description and quantity needed per assembly are listed in numerical order on the following pages.

How to use this parts manual

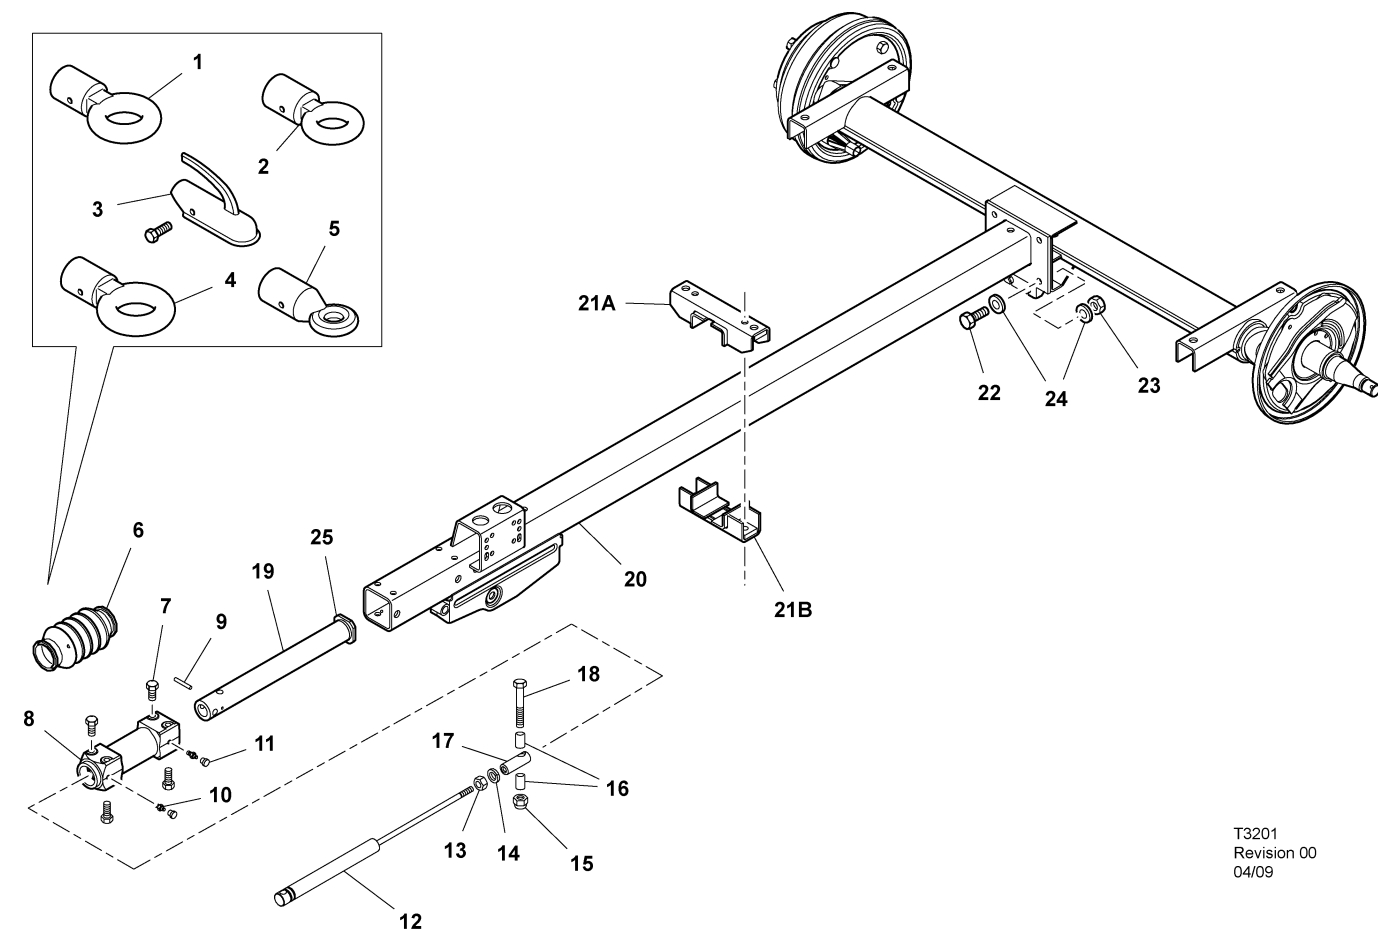

1. Locate the desired illustration.
2. Locate the part on the illustration by visual identification and note the reference number.
3. Find the reference number on the tabulated page, along with the Part Number and Description.

How to order parts

In order that all avoidable errors be eliminated when ordering parts, please specify the following:

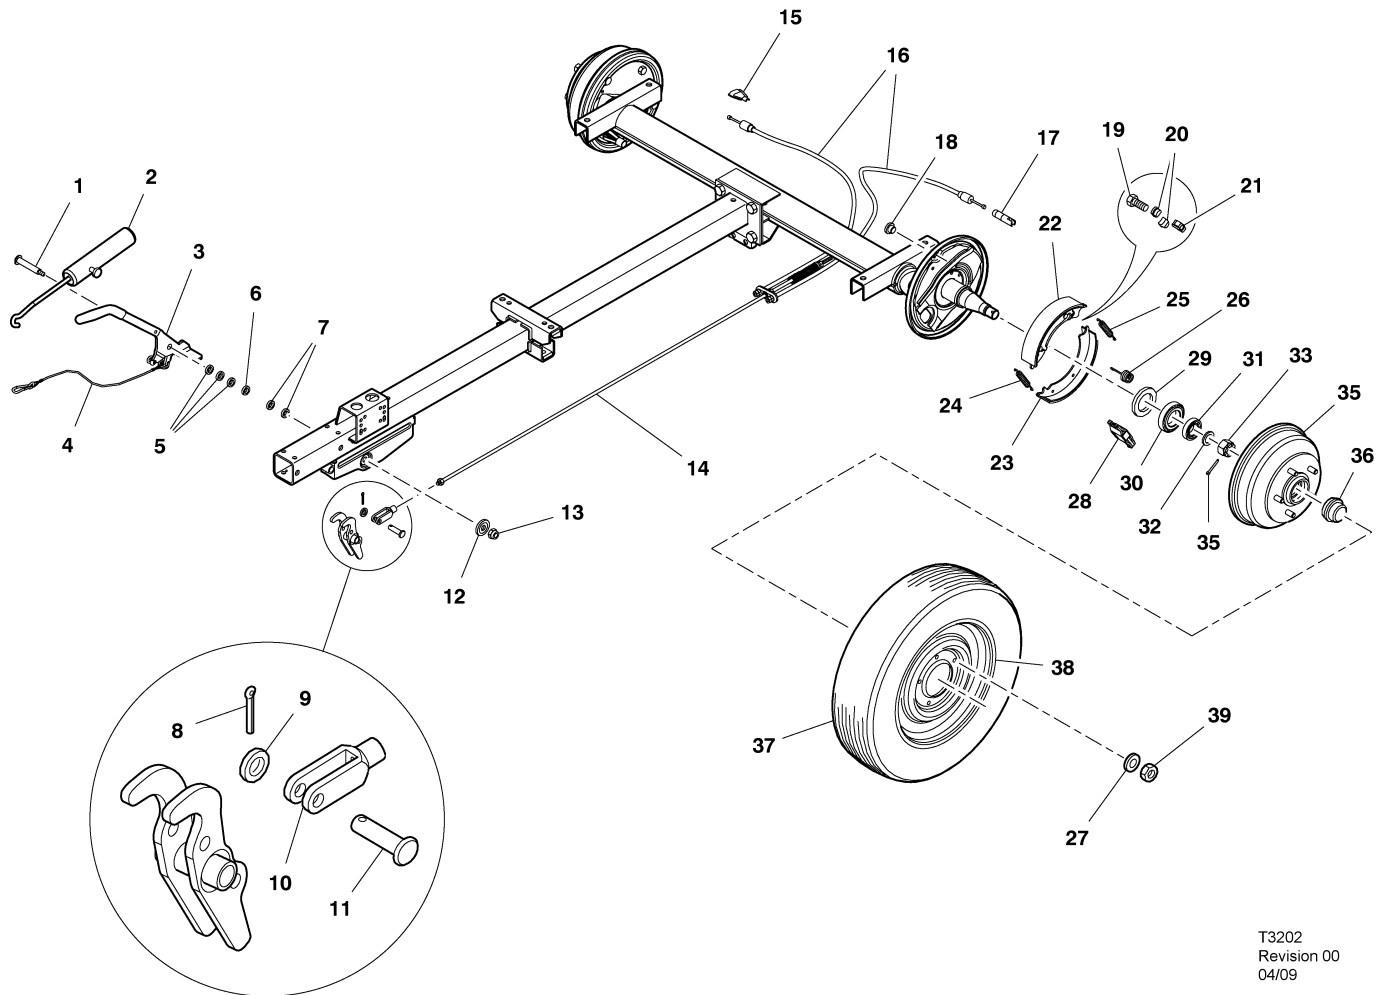

1. The model number of the unit as shown on the Compressor Data Plate.
2. The serial number of the unit as shown on the Compressor Data Plate.
3. The part number of this manual.
4. The part number, description and quantity needed exactly as listed.
5. The motor data code shown on the motor data plate.

This range of air delivery hose is readily available in the two most commonly used sizes of 3/4" and 1" I/D, in three lengths; 15m (50') complete with fittings, 4m (13') complete with fittings and random lengths. Please note the CPN given for the random lengths is a per metre measurement, therefore when ordering please specify the number of metres required.

The chart is by no means exhaustive, additional sizes or fitted lengths can be made available on request to suit your individual needs. Similarly the chart only gives details of air delivery hose at 15.5 bar (225 psi) working pressures. Should you require higher working pressures or different types of hose please contact Portable Power Aftermarket, via your normal channels.

CPN	Hose I.D. (Inch)	Hose I.D. (mm)	Hose O.D. (mm)	Working pressure (psi)	Burst pressure (psi)	Weight Kg/Mtr
35393990 60m Length	3/4"	19	30	225	675	0.580
89310718 15m length fitted	3/4"	19	30	225	675	0.580
92737840 4m length fitted	3/4"	19	30	225	675	0.580
92047331 60m Length	1"	25	36	225	675	0.830
92112226 15m length fitted	1"	25	36	225	675	0.830
92737857 4m length fitted	1"	25	36	225	675	0.830

To complement our range of air hose, we also offer a full range of hose couplings, seals and clamps, each manufactured to the highest quality. All couplings feature double locking action to ensure on site safety.

Some air tools are manufactured with an integral oil supply built into the handle. In cases where no such supply exists a lubricator installed within the air line ensures that air tools operate at peak efficiency and reduce costly repair and downtime.

The lubricator should be located as near to the tool as possible but satisfactory lubrication will be provided if installed as far away as 25ft (7.62m). Immediately upon operation of an air tool a fog of oil is automatically injected into the air stream and lubrication of the tool will continue as long as there is oil in the lubricator.

The oil supply, which is adjustable, is easily checked through the pressure proof window, and refilling is made simple by use of a large filler cap. Whenever the cap is removed it automatically vents the reservoir pressure allowing refilling without shutting down the air supply.

ccn	Quantity	Description
46518098	1	Diagnostic tool (QC5100)

NOTE:
• PowerSpec CE reads Cummins engine configuration settings • PowerSpec CE transfers a HotSpec created by the PowerSpec PC application to your Cummins engine • PowerSpec CE reads active and inactive faults • PowerSpec CE clears inactive faults • PowerSpec CE reads and resets vehicle trip data • QuickCheck CE reads electronic engine and vehicle subsystem data • QuickCheck CE reads engine/vehicle operating parameters • QuickCheck CE reads and stores active and inactive faults • QuickCheck CE reads and stores dataplate information • Stored information on the QC5100 handheld computer can be downloaded to a PC with an ActiveSync[®] operation • Operating parameters displayed by QuickCheck CE can be changed using QC Configurator
More information can be found in Service Letter SL 40006-EN
