Doosan Infracore Portable Power

Parts News – February 2010

NEW

VISION – Doosan GPS Applications

A lot more than a tracking device!

The Doosan **Vision** GPS system is not only a GPS system. It offers a wide range of applications that will provide you and your customers a new way of managing your machines and service vans fleets. Here are just a few examples:

- **Anti-theft** system
- **Invisible** once installed
- **Geofencing**: define a virtual allowed working area
- **Monitoring of working hours**, avoid disputes on invoicing
- Monitoring of machine use and **technical problems**
- **Monitoring of failure risks** to avoid major repairs (2 free sensors to connect to selected parameters will send real time warnings in case of risk (oil pressure, water in fuel, plugged air filter,...))
- Spotting of the service van that is **closest to the customer**: reduce fuel cost and travel time.
- **Analysis of activities** on a given period
- Performant **navigation** device

A new approach of fleet and service vans management
