Subject:	Exhaust flexible clamp replacement		

Models	
7-26E	SN, see table below
7-31E	SN, see table below

Some clamps used to tighten the exhaust flexible on the engine exhaust pipe and muffler were found to give insufficient clamping load. As a result the flexible can disengage.

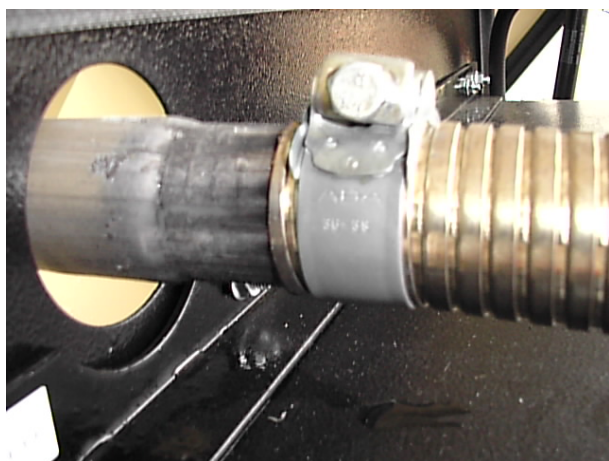

Figure 1 Old clamp

To solve this problem a U-bolt clamp CPN 92898576 is now used. Refer to Figures 2 and 3 for the orientation of the clamps.

Make sure the flexible is equally engaged at least 30 mm on both sides and not fully extended to leave it some flexibility.
